John,

Per your e-mail below, I approve the LCCS Group's proposal to conduct the first surface water sampling event as described in the approved *Surface Water Sampling Work Plan, Indian Ridge Marsh*, dated October 24, 2019, and the *Surface Water Sampling Work Plan Addendum, Indian Ridge Marsh* dated February 7, 2020. Hi Shari:

Per our conversation today, the purpose of this email is to confirm USEPA's approval for the LCCS Group to conduct the first surface water sampling event described in the *Surface Water Sampling Work Plan*,

Indian Ridge Marsh, dated October 24, 2019, and the *Surface Water Sampling Work Plan Addendum, Indian Ridge Marsh* dated February 7, 2020, both of which were approved by USEPA on February 7, 2020.

This approval is based on the results of water level monitoring data collected between May 30 and July 11, 2020, summarized in the attached chart, and the expectation that conditions at the time of the first sampling event (anticipated in early September) will be consistent with these results that indicate groundwater flow from the LCCS site towards Indian Ridge Marsh.

If you could reply confirming your approval, it would be much appreciated. Meanwhile, should you have any questions or need any additional information please let me know and I will keep you informed as to our schedule for sampling.

Best regards,

JL
